

YTOR175ST-RFOG-1A5 FTTB RFoG Optical Node OBI FREE

RFOG Node series are bidirectional optical receivers supporting RFOG mode. The upstream output optical wavelength can be set as CWDM standard to realize OBI Free.

4 groups of wavelengths are optional: 1450, 1470, 1590, 1610nm, each group can be adjusted by 4 wavelengths with an interval of 0.5-1nm. Total 16 different wavelengths.

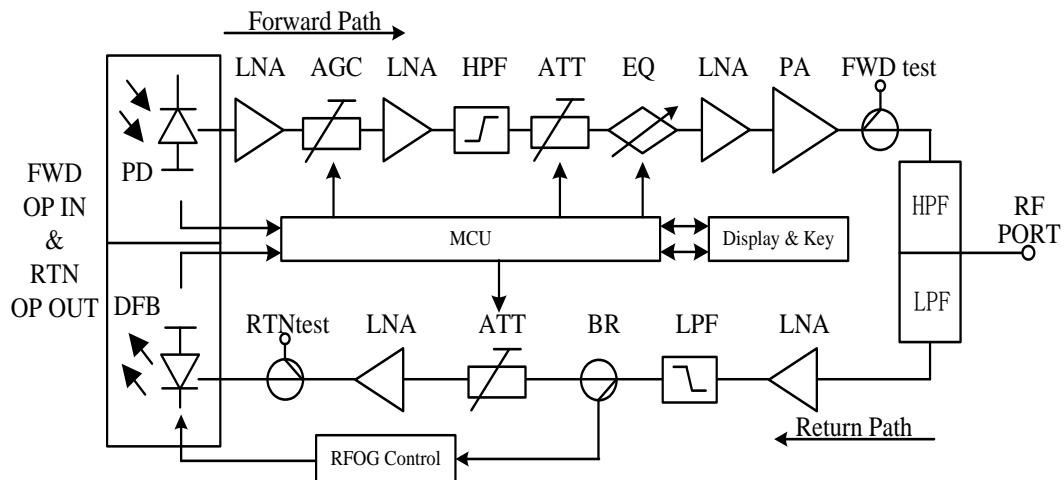

Frequency Range: 5~85/110~1218MHz, support update to (5~204/258~1218MHz).

Support optical AGC, and control range is 0 ~ -5/-6/-7/-8dBm adjustable.

Adopt electric adjusting mode for both EQ and ATT circuit, nixie tube display.

Support DOCSIS3.0 and DOCSIS3.1 system and OBI Free.
